

LLAMA M-87

THE ULTIMATE COMP PISTOL

LLAMA M-87

THE ULTIMATE COMP PISTOL

LLAMA, located in the heart of the Basque region of Spain, has been manufacturing high-grade quality handguns since 1903 and has recently made a substantial investment in high tech computer-controlled machining centers. This 21st century hi-tech machinery has enabled the factory to produce the new "match ready" **LLAMA M-87** Comp pistol designed specifically for the professional shooter. All of the features demanded by the serious competitive shooter are already built into the M-87 so that it is virtually "out-of-the-box" ready for the range.

DOUBLE ACTION 9mm: "Out-of-the-box" match ready.

COMPENSATOR: Full profile • reduces muzzle lift • increased speed to get back "on target" • dual port internal expansion chamber • reduces recoil.

TRIGGER: Clean • crisp • smooth • positive • creep-free • no over-travel • trigger stop adjustment • concave, checkered and extended trigger guard.

SAFETIES: Manual thumb safety allows for quick release • oversize and extended lever for speed • conventional hammer block safety with ambidextrous (dual) levers.

MAGAZINE: 15 rounds • ambidextrous magazine release button is oversize and extended • tapered top allows for quick insertion • bumper pad ensures positive seating • pad also minimizes damage from dropping while rapid firing.

FRAME: Investment casting from Llama's state-of-the-art investment casting factory • beavertail extension for greater hand control and comfort • magazine well flared and bevelled providing for rapid magazine insertion.

SIGHTS: Low-profile combat sights • rapid target acquisition.

TILTING-BLOCK LOCK UP MECHANISM:

Operates "in line" with the barrel • eliminates downward drop to unlock • no separate barrel bushing which in turn provides a more solid and stable enclosure at the muzzle for greater accuracy.
